Access Venture Partners

Access Venture Partners is an early stage venture capital fund. Together over the past 14 years, the partners at Access Venture Partners have invested in over fifty early stage companies and have served as founders and early executives of numerous companies. Through this experience we have built an understanding of how to navigate the challenges associated with building successful companies and drive them to success.

Our passion is helping entrepreneurs build great companies. We do much more than merely supplying capital; we actively participate in building the management and distribution infrastructure required to aggressively grow new businesses. As investors, we wear many hats in supporting our portfolio companies, helping to design sales and marketing strategies, define product road maps, recruit talent and raise capital.

Our Investment Focus

We have offices in Austin and Denver and invest throughout North America. Access typically makes its initial investment as part of the first institutional round and often continues investing in subsequent rounds. Our current investment activity is focused on the following areas of interest:

- Clean Technologies
- SaaS and SaaS Infrastructure
- Data Integrity
- New Media

No list would be exhaustive; we also keep an open mind and consider unique opportunities. In general, we look for high gross-margin businesses in large markets, not narrow niches.
